# Hope College of Arts & Sciences

## Hope College of Arts & Sciences

### **Vision**

Our vision is to reach and equip the underserved population to professionally excel in the growingly competitive healthcare field through the impact of research, educational programs and professional partnerships.

### **Philosophy**

The philosophy of the college is based upon the faculty's collective beliefs about the person, health, environment, nursing, learning-centered education, and nursing education. The philosophy serves as the foundation for development of all program curricula, including program outcomes, learning objectives, teaching and learning activities, student assessment, faculty professional development, and selection of learning resources. Student-centered learning forms the foundation of this philosophy.

### **Mission**

Our mission is to prepare qualified entry-level and professional nurses to work in diverse healthcare settings. Partnerships with members of the southeast Florida healthcare community are essential to the mission's success. The programs accomplish their mission by providing a challenging education that prepares students to think logically, critically, and analytically in order to problem-solve effectively and make sound clinical decisions; communicate effectively; and to integrate knowledge, skills, values, and professionalism in the delivery of high-quality health care.

## Associate of Science in Nursing

The Associate of Science in Nursing (ASN) program is designed to prepare a nurse generalist for practice that integrates the knowledge and skills for entry level positions in the healthcare industry. This degree is earned by completing the program course requirements of 77 credit hours. This program is generally completed within 24 months, with some the classes offered online.

### **Program Outcomes**

- Communicate effectively.
- Listen and think critically.
- Practice in accordance with the legislation affecting nursing practice and healthcare.
- Practice within a professional and ethical nursing framework.
- Provide comprehensive, safe, and effective nursing care to achieve identified patient outcomes.
- Evaluate progress towards expected patient outcomes in consultation with the health care team.
- Establish, maintain and appropriately conclude therapeutic relationships.
- Assume leadership roles within the profession.
